

Project Leader

Our Big Story

EcoSystems is saving billions of gallons of freshwater and millions of tons of CO2 by proving that conservation is good for business. We are one of the fastest growing companies in the country (#48 on 2020's Inc 5000) and continue to be a leader in the conservation industry. Join us on the front lines of the fight against climate change.

Overview

We are looking for an energetic, driven, entrepreneurial candidate with a strong desire for personal growth. As a Project Leader, you will be the central hub interfacing with our field service installation teams as well as our customers. You will use your knowledge and experience to oversee and deliver world class projects, coach and align your teams with the company mission, and assist in creating new installation procedures, safety measures and training programs. As a fast growing company, we are in need of an individual who has the technical knowledge and experience to build effective teams and help us continue to improve our Field Services Department.

Your position will report to the Vice President of Field Services. Preference will be given to candidates that will work out of our Miami office, but we are open

Responsibilities:

- Own the successful completion of EcoSystems projects from inception to completion
- Ensure a positive customer experience through world class quality control and customer support
 - Maintain and develop lasting relationships with project stakeholders
 - Directly oversee multiple projects at a time
 - Communicate important project information to customers and internal stakeholders in a timely manner
 - Coach, mentor, and inspire 2 to 4 high performing project managers and installation teams
 - Support the recruiting team in the hiring process, where necessary
 - Hold regular status reviews with project managers to ensure accurate forecasting, profitability, safety, and accountability
 - Coordinate with Logistics & Purchasing to ensure timely delivery of products
 - Travel regularly to projects all over the United States

What You'll Need:

- 5+ years of experience in Project Management
- A proven track record of delivering successful projects, and of developing & managing remote teams
- Willingness and ability to travel up to 50% of the time
- Demonstrable proficiency in LED lighting, energy conservation, water conservation, and/or HVAC
- Strong communication skills; ability to connect with people from a wide variety of backgrounds
- Ability to take on a task, break down into actionable components, formulate a plan, execute with a team, and clearly communicate regular progress
- Proficiency with Microsoft Office (Word, Excel, PowerPoint) and GSuite is required.
- An understanding of OSHA safety standards
- Experience with Salesforce and project management systems are a plus
- A commitment to EcoSystems' mission

EcoSystems is an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

All qualified applicants must be able to satisfy the Department of Homeland Security Form I-9 requirement with the documents necessary to verify identity & employment authorization. If hired, you must sign a confidentiality and non-compete agreement, and successfully pass a background screening with EcoSystems.
